SUMMARY

Software engineer with five years of experience across Amazon, startups, and independent consulting, including time as an engineering manager. Full-stack breadth in TypeScript, Python, and Java, with recent work focused on AI-agent tooling and the infrastructure that runs it.

EXPERIENCE

Fisher Research

Seattle, WA

Self-employed Contractor

February 2026 - Present

- Created prorealtorreferrals.com, a buyer-referral management site for a vacation rental company; pulls CRM data through the GoHighLevel API. Built with NextJS, hosted on Cloudflare.
- Created Duree (duree.dev), a cross-platform desktop app for personal time tracking. Built with Tauri (Rust), React, and NextJS, with Supabase (Postgres) for realtime sync.
- Created Brot OS (OSS), a cross-platform TypeScript virtual OS for AI-native workflows with cross-device workspace sync.

Summation

Bellevue, WA

Backend Engineer

October 2024 - February 2026

- Built a gRPC chat service on the Claude Agent Python SDK for interacting with financial spreadsheet data.
- Created a Python + uv CLI making client financial data accessible to AI agents.
- Managed infrastructure for AI-agent sessions with Terraform, Kubernetes, and AWS Fargate.
- Ran scheduled AI eval jobs as Lambda crons, managing secrets with AWS Secrets Manager.
- Created a Java Spring backend service for the Summation platform's spreadsheet UI, handling CRUD operations and stylized cell formatting in pivot tables.
- Conducted 100+ technical interviews for senior engineering roles as part of the hiring process.

Stackline

Seattle, WA

Engineering Manager

August 2023 - May 2024

- Managed the web team's frontend engineers. Conducted 1:1 meetings, performance reviews, and biweekly training sessions.
- Ran weekly planning meetings with senior leadership to create new products, set quarterly goals, and manage team organization.

Software Development Engineer II

December 2022 - May 2024

- Led creation of a new web product forecasting customer retail metrics (CPC, ROAS, etc.). Established company-wide patterns for fetching, transforming, and displaying data in graph components (React, Tanstack, Highcharts).
- Led the Amazon AMC integration in Stackline's ads manager product, creating and documenting data-fetching patterns for AMC graphs across every page of the platform.

Amazon

Seattle, WA

Software Development Engineer

May 2021 - November 2022

- Built a greenfield Android application for receiving inbound product shipments at Amazon Go and Amazon Fresh physical stores.
- Managed multiple backend Java services, powered by AWS SQS, DynamoDB, and Lambda, responding to physical-store stocking events performed by store associates.
- Led the org-wide migration of store-associate web tools from AngularJS to React. Ran cross-org trainings on migrating legacy code and coordinating cross-team microservice dependencies.
- Served in the team's on-call rotation, using CloudWatch logs to triage and resolve production incidents across backend services and physical-store systems.

EDUCATION

Brigham Young University

Provo, UT

B.S. Computer Science

2017 - 2021
